**Announcing our Fall 2021 offering of the FCMA Leadership Academy
*Introduction to Manufacturing Training Program***

FCMA is excited to present our 10th offering of the employee training class for *Introduction to Manufacturing!* The program continues to get very favorable reviews from over 80 students and 18 different member companies who have participated to date!

The classes are presented through Florida State College of Jacksonville and represent 40 classroom hours over a 10-week period at the FSCJ Advanced Technology Center located on their downtown campus. Classes are held on Wednesday afternoons from 1:00 PM - 5:00 PM and represent a combination of instructor led discussions as well as hands-on laboratory exercises. Tuition cost is \$950 per student all-inclusive for FCMA members and \$1,235 for non-members. Class size is limited to ensure enough space for the laboratory exercises, and registrations are taken on a first come/first serve basis.

The program will focus on the following basic manufacturing and maintenance topics:

- Electricity & Motor Control
- Pneumatics
- Hydraulics
- Programmable Logic Systems (PLC's)
- Pumps and Valves

The target audience for this program is any new manufacturing employee who has little or no experience in these areas, or any employee who may have an interest in moving into a maintenance role that would require some background knowledge in these areas. Note that this is considered a basic, entry-level training program for these topics. Quoting one of the students in our last class, ***"This class really gives you a strong understanding of industrial functioning equipment"***.

Course schedule is as follows:

- September 15 - Electricity & Motor Control
- September 22 - Electricity & Motor Control
- September 29 - Pneumatics
- October 6 - Pneumatics
- October 13 - Hydraulics
- October 20 - Hydraulics
- October 27 - PLC's
- November 3 - PLC's
- November 10 - Pumps & Valves
- November 17 - Pumps & Valves
